Mr. Carl Fredrick
2116 South Linden
Springfield, MO 65804

Dear Sir:

This is concerning the waste stabilization lagoon serving the Hi-View Mobile Home Park and operated under NPDES Permit No. MO-0048828. It was recently noted that the lagoon has apparently turned septic. This is a common occurrence during the spring after an extended ice cover.

Enclosed you will find a handout of recommendations for the application of sodium nitrate. I suggest that you take immediate steps to get the problem corrected. You should note that it is very likely that the effluent will exceed the limitations when the lagoon is septic which is a violation of state and federal laws.

Please advise us of your intentions and progress. If you have any questions, please advise.

Yours truly,

Charles L. Kroeger
